

DISCONNECTS  
to 600 AMPS

400 - 630 AMP

| SHAFT EXTENSION KITS |         |                  |       |
|----------------------|---------|------------------|-------|
|                      | PART #  | LENGTH<br>L (mm) | LIST  |
| D                    | 206 406 | 300              | \$137 |

**International requirements:** The type DL8 and DL9 disconnects comply with the requirements of DIN EB 60 204 part 1 / VDE 0113 section 5.3 for hand-operated main switches. According to EN 60 947-3 European Norm, the disconnects are also rated to comply with utilization category AC-23B.

**Voltage rating:** 1000 Isolation Volts, DL series switches comply with the isolator requirements according to VDE for 1000 V in 3-phase systems. The connection terminals have individual terminals for connection to lugs or bus. The double lever type handle DHV is equipped with an interlocking for 3 padlocks.

**3-pole or 4-pole:** The switches can also be supplied in 4-pole execution as switching neutral.

Operating handle red -  
Face plate yellow RG
