

40180

Tone Generator and Amplifier Probe Kit

\$79

Heavy duty kit with audible tone easily identifies wires or cables

Features:

- Insulated inductive probe tip prevents shorting conductors
- Tests include wire trace, continuity test, clear/busy/ringing line test and tip/ring identification
- Alligator clips for non-terminated cables and modular connectors for direct connections to telephone and internet wiring
- Selectable continuous or variable tone generation
- Built-in speaker on probe with sensitivity control
- RJ45 and RJ11 modular connectors
- Dimensions: Probe - 9x2.3x1" (228x57x25mm); Generator - 2.5x2.5x1.5" (64x64x38mm)
- Weight: 0.6lbs (272g)
- CE approved
- One year warranty
- Complete with Amplifier probe and Tone Generator with alligator clips and modular RJ11 phone and RJ45 digital connector cables, 9V batteries and case

Alligator clips plus modular connectors for all testing needs.

Trace phone/data wiring.

TG30

Wire Tracer/Tone Generator Kit

\$49

Trace communications and coaxial cables

Features:

- Non-Contact probe audibly identifies selected wire or cable
- Easily trace wires from source to termination
- Adjustable sensitivity control improves wire identification and eliminates false detection
- Continuity test with audible and visible indication
- Dimensions/Weight: Probe - 5.8x1.1x1.1" / 1.1oz (147x28x28mm) / (30g); Generator - 2.6x4.1x0.9" / 4.2oz (67x103x23mm) / (120g)
- Complete with Tone probe and Tone generator with RJ11 and RJ45 phone connector plus adaptor with F type coaxial connector and pair of alligator clips, four LR44 batteries, 9V battery and carrying case

Transmitter injects traceable signal into cables, checks telephone lines, and performs continuity checks.

Applications

- Locate LAN cable at the patch panel
- Easily identify telephone and LAN pairs
- Tone and identify CATV runs
- Identify wire pairs
- F type connector for testing 75Ω coaxial video cable

Includes adaptor with F type coaxial connector and pair of alligator clips.
